# Provider network: there's always a provider in sight

One size does not fit all. That's why we created a network that features both private practice and retail providers to allow you a choice for your eye care. Some people prefer the personal service of a private practice provider, especially if they have a long-standing relationship with a family eye doctor. Others prefer the convenience of retail chain providers, which often offer evening and weekend hours.

UnitedHealthcare vision offers a diverse network of more than 55,000 access points, including both private practice and leading retail chain providers. Our plan allows you to pick the provider that matches your lifestyle and eye care needs.
